

## Environmental Policy

### Our Commitment to Sustainability

Mikro-Technik GmbH & Co. KG is committed to responsible management of the environment and natural resources. As a manufacturer of high-quality natural fiber products and cellulose derivatives, we recognize our special responsibility for environmental protection.

### Core Principles

- Use of renewable raw materials: We rely on organic fiber materials as the basis for our products, which nature provides in almost unlimited quantities
- Continuous improvement: Our competence team constantly works on making our production facilities more energy-efficient and environmentally friendly
- Compliance with legal requirements: We are committed to strict compliance with all environmentally relevant laws and regulations

### Measures

- Energy efficiency: Implementation and regular review of energy-saving measures in all areas of the company. We are certified according to ISO 50001.
- Waste management: Development of strategies for waste prevention, separation and recycling.
- Water protection: Minimization of water consumption and responsible handling of wastewater.
- Emission reduction: Continuous efforts to reduce air emissions and noise pollution.

### Implementation and Control

- Regular training: Raising awareness and further education of all employees in environmental matters.
- Environmental management system: Introduction and maintenance of an effective environmental management system.
- Transparency: Open communication of our environmental performance to stakeholders and the public.

This environmental policy reflects our endeavor to make a positive contribution to environmental protection as a responsible company. We commit to regularly reviewing and developing this policy to continuously improve our environmental performance.
